

## Day 6 (By Ninad Mandavkar)

Use Netflix dataset and find out country wise shows and total cast for each country. Show the stacked bar chart for the same as shown in the image below.

ANS:

1. Create 2 Calculated fields 'Total\_Cast\_countrywise' and 'Total\_Sales\_Countrywise' by fixing 'Country' as the Level of Detail (LOD).

Total\_Cast\_countryv

×

```
{ FIXED [Country]: COUNTD([Cast]) }
```

The calculation is valid.

1 Dependency ▾

Apply

OK

Total\_Shows\_countr

×

```
{ FIXED [Country]: COUNTD([Show Id]) }
```

The calculation is valid.

1 Dependency ▾

Apply

OK

2. Drop 'Country' in the column shelf and 'Measure Values' in the row shelf. 4 Measure values (2 of Count and 2 of SUM) will be created in the Marks card. Discard the two Count pills from Marks card. Lastly drop 'Measure names' in the Colour card. Customise the colour you want in the visual and get the image below:
